CHARACTERIZATION OF LECTIN-CARBOHYDRATE INTERACTIONS

Condition: New. Publisher/Verlag: AV Akademikerverlag | New mass spectrometry approaches for characterization of Protein-Sugar interactions | Galectins are a family of endogenous lectins with adhesion growth-regulatory activity binding galactosides. They are also known to play important roles in cancer, inflammation and a lot of other biological processes. Because of such features characterisation of galectin-carbohydrate interactions and identification of binding sites is of crucial importance for drug design. In the present study rat galectin-5 (rGal5) peptides containing key amino acids involved...
