International Finance Discussion Papers: Evaluating a Global Vector Autoregression for Forecasting

By Neil R. Ericsson

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Global vector autoregressions (GVARs) have several attractive features: multiple potential channels for the international transmission of macroeconomic and financial shocks, a standardized economically appealing choice of variables for each country or region examined, systematic treatment of long-run properties through cointegration analysis, and flexible dynamic specification through vector error correction modeling. Pesaran, Schuermann, and Smith (2009) generate and evaluate forecasts from a paradigm GVAR with 26 countries, based on Des, di Mauro, Pesaran, and Smith (2007). The current paper empirically assesses the GVAR in Des, di Mauro, Pesaran, and Smith (2007) with impulse indicator saturation (IIS)-a new generic procedure for evaluating parameter constancy, which is a central element in model-based forecasting. The empirical results indicate substantial room for an improved, more robust specification of that GVAR. Some tests are suggestive of how to achieve such improvements. This item ships from La Vergne, TN. Paperback.

Reviews

An extremely awesome publication with lucid and perfect explanations. It is actually written in basic phrases rather than confusing. You will like how the writer publishes this book.

-- **Melody Jakubowski**

Completely among the best pdfs I actually have possibly read through. It is probably the most awesome pdf we have read. You won't really feel monotony at whenever you want of your time (that's what catalogs are for about in the event you ask me).
