Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Rail Failures for the Trackman: With Notes on Rail Specifications, Rail Manufacture, and Rail Sections The causes of Rail Failures and the remedies therefor, constitute a problem which requires the most careful study by every employe in the Maintenance and Operating Departments of any railroad, from the Section Foreman to the Chief Engineer and General Manager. The elimination of Rail Failures, in a commercially practical way, is the subject of careful investigation by the manufacturers and by the railroads. This investigation has been carried on, for the railroads, by the American Railway Engineering Association, the details being handled by its Committee on Rail. The safety of the traveling public and of the employe is involved in this question. To study it intelligently one must have at least an elementary knowledge of the process of rail manufacture, and of the specifications under which a rail of good quality can be delivered, as well as a knowledge of what constitutes good practice in Maintenance and Operation. It is the aim of this book to give the Trackman sufficient information on Rail Manufacturing Practice to enable him - 1. To properly classify each failure, 2. To report intelligently on any internal or external defects disclosed by careful examination of the fractured surfaces, 3. To make proper entry of above on his rail failure report, together with data concerning track and equipment conditions.
