Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Grape Culture in Steuben County Knowing that any particular locality has long been devoted to this culture we are able to fix the mean temperature thereof, and by studying the circumstances prejudicial to the development of the vine, avoid the failures so often experienced by those who undertake this culture where it is impossible. The grape requires four months, or one hundred and twenty days, to come to maturity; we can calculate the aggregate of temperature required to perfect its growth. Bordeaux, in France, being in latitude 44 50 , has a mean temperature in spring of 56, in summer of 71, in autumn of 58; mean for spring, summer and autumn of 62 40 . And, as Bordeaux is near the centre of the wine districts of France, a data is furnished, other things being equal, of the climate required for the cultivation of the vine. It is an interesting study to investigate the particular features of the various vine-growing districts in Europe and the United States, and to notice that neither latitude, nor elevation, nor the amount of rain falling governs, but that other causes combine to render the cultivation certain and profitable. Also, to notice that the range of temperature is not so much controlling as we are inclined to believe. The grapes of Astrachan are said to be equal to the best of Italy, and the range of temperature there is more extreme than in many places of our own country. Astrachan is in latitude 46 21 , on a level with the sea; has a mean temperature in spring of 52 6 , in summer of 75 9 , in autumn of 52 4 ,...
