On the Shores of Titans Farthest Sea: A Scientific Novel (Science and Fiction)

By Michael Carroll

Springer. Paperback. Condition: New. 250 pages. The ember glow of the horizon shimmered in the sullen undulations of the sea, oily and dark. In the distance, a curtain of methane rainfall draped across the sky. To its left, low over the hills, the golden glow of Saturn smoldered behind layers of fog and scattered cloud. The views from Titans Mayda Outpost are spectacular, but all is not well at the remote science base. On the shore of a methane sea beneath glowering skies, atmospheric researcher Abigail Marco finds herself in the middle of murder, piracy and colleagues who seem to be seeing sea monsters and dead people from the past. On the Shores of Titans Farthest Sea provides thrills, excitement and mystery couched in the latest science on one of the Solar Systems most bizarre worlds, Saturns huge moon Titan. This riveting story, set against a plausibly well integrated interplanetary space, carries us along with its bright and interesting characters. We feel absolutely transported to a hauntingly beautiful and alien Titan through Carrolls masterful weaving of art and science. Jani Radebaugh, Professor of Planetary Sciences, Titan dune expert, BYUIts a fun read! Really makes Titan come alive, literally.
