INFLUENCES OF MICROSTRUCTURE, ALLOYING ELEMENTS AND FORMING PARAMETERS ON DELAYED FRACTURE IN TRIP/TWIP-AIDED AUSTENITIC STEELS

Shaker Verlag Nov 2012, 2012. Buch. Condition: Neu. Neuware - Hydrogen assisted delayed fracture is a non-negligible obstacle for fully application of the excellent formability of the TRIP or TWIP-aided austenitic steels. The current work compared delayed fracture behaviour in Meta-stable Austenitic Stainless Steels (MASS) and High Manganese Steels (HMS) by carrying out quasi-static tensile test, slow strain rate test and deep drawing test. In-depth investigation of the response of mechanical properties at different hydrogen levels elucidated the influences of...

Reviews

Complete information for publication fans. Better than never, though i am quite late in start reading this one. Its been written in an extremely straightforward way in fact it is just soon after i finished reading this ebook in which basically altered me, change the way i believe.

-- **Ellie Stark**

Totally among the finest pdf We have possibly read through. It usually fails to price a lot of. I discovered this book from my i and dad suggested this pdf to learn.

-- **Michale Beier I**

Definitely among the finest book We have at any time read. Better than never, though i am quite late in start reading this one. Your lifestyle period will likely be transform once you total reading this article book.
