Reviews

*It is fantastic and great. It is written in easy words and phrases instead of confusing. I am just delighted to explain how this is actually the best book I have got read through during my individual life and might be the finest publication for ever.

THE BRITISH JOURNAL OF DENTAL SCIENCE, VOL. 33: JANUARY-DECEMBER, 1890 (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The British Journal of Dental Science, Vol. 33: January-December, 1890 It goes without saying that all the signs and means of diagnosis so far mentioned, which are referable to the discharge of the secretion, into the nose, will be only available when such a discharge can take place, 73.e., when the maxillare of the antrum is unobstructed. Obstruction of this, opening greatly modifies both symptoms and means of diagnosis. Such an obstruction may be caused by very thick, creamy consistence of the pus, especially if the opening be naturally narrow, by swelling or hypertrophy of the nasal mucous membrane in the neighbourhood of the ostium, by nasal polypi or foreign bodies in the nose occluding the opening, or by the formation of granulations around it, etc. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
