JESSICA KINGSLEY PUBLISHERS, United Kingdom, 2011. Paperback. Condition: New. Language: English . Brand New Book. Breaking new ground in the areas of attachment and child development, Sue Jennings introduces the concept of Neuro-Dramatic-Play exploring the sensory experiences that take place between mother and child during pregnancy and the first few months after birth. She explains how this interaction, that is essentially dramatic in nature, is of crucial importance for the infant to develop a healthy brain, strong attachments and future resilience. Based on sound experience and observation, this book consolidates current theories of neuroscience, attachment and therapeutic intervention and challenges commonly held psychoanalytic ideas of child development. By expanding on the often narrow view of what is understood by attachment, this book makes a strong case for early years inclusion of play and arts therapies. Neuro-Dramatic-Play is also discussed in relation to fostering and adoption, teenagers and young adults, and children with developmental or cognitive disabilities. This accessible text will interest all therapists and practitioners who work with children and teenagers, including child psychotherapists, psychologists, social workers, paediatric and perinatal nurses, paediatricians, child psychiatrists and play and arts therapists, and post-graduate students.
