Excerpt from Construction of Optimal Sequential Decision Trees Since each term in the sum is ≥ 0 , it is clear that the entropy is zero if and only if the probability of some object is equal to 1. Therefore, if the entropy is not zero after several tests have been applied it is not possible that the object has been identified. Similarly, if the average decrease in entropy produced from several tests is not at least equal to the initial entropy then it is not possible for the objects to.
