Placing the lamp in the drum.--The lamp may be lifted by the top plate, but it should never be lifted by the carbon supports, as the strain due to its weight is liable to spring them out of their correct position. The 18-inch and 24-inch projectors have obturators which prevent carboning the lamps before they are placed in the drums. The drums of these projectors are, however, sufficiently large to readily permit adjustments of the carbons after the lamps are in place. When inserting the 18-inch or 24-inch lamp in the drum, the shutters of the obturator should be opened and the arc magnet turned so that the opening is downward. This adjustment may be made after removing the pin on the side. The lamp may now be placed in the projector, the arc magnet returned to its proper...
