

## Econometrics with MATLAB. Univariate Time Series Analysis (Paperback)

Filesize: 3.29 MB

### **Reviews**

*The ebook is simple in read easier to recognize. It is one of the most awesome book we have read through. I am happy to explain how this is basically the finest pdf we have read inside my very own lifestyle and may be he finest publication for actually.*  
*(Jaiden Turcotte DDS)*

**ECONOMETRICS WITH MATLAB. UNIVARIATE TIME SERIES ANALYSIS (PAPERBACK)****DOWNLOAD**

Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Econometrics Toolbox provides functions for modeling economic data. You can select and estimate economic models for simulation and forecasting. For time series modeling and analysis, the toolbox includes univariate Bayesian linear regression, univariate ARIMAX/GARCH composite models with several GARCH variants, multivariate VARX models, and cointegration analysis. It also provides methods for modeling economic systems using state-space models and for estimating using the Kalman filter. You can use a variety of diagnostics for model selection, including hypothesis tests, unit root, stationarity, and structural change. A probabilistic time series model is necessary for a wide variety of analysis goals, including regression inference, forecasting, and Monte Carlo simulation. When selecting a model, aim to find the most parsimonious model that adequately describes your data. A simple model is easier to estimate, forecast, and interpret. -Specification tests help you identify one or more model families that could plausibly describe the data generating process. -Model comparisons help you compare the fit of competing models, with penalties for complexity. -Goodness-of-fit checks help you assess the in-sample adequacy of your model, verify that all model assumptions hold, and evaluate out-of-sample forecast performance. Model selection is an iterative process. When goodness-of-fit checks suggest model assumptions are not satisfied or the predictive performance of the model is not satisfactory, consider making model adjustments. Additional specification tests, model comparisons, and goodness-of-fit checks help guide this process. The most important content is the following: -Econometrics Toolbox Product Description -Econometric Modeling -Econometrics Toolbox Model Objects, Properties, and Methods -Stochastic Process Characteristics -Data Transformations -Data Preprocessing -Trend-Stationary vs. Difference-Stationary Processes -Nonstationary Processes -Trend Stationary -Difference Stationary -Specify Lag Operator Polynomials -Lag Operator Polynomial of Coefficients -Difference Lag Operator Polynomials -Nonseasonal Differencing -Nonseasonal and Seasonal Differencing -Time Series Decomposition -Moving...
