

Underground Ventilation at Butte (Classic Reprint)

By Daniel Harrington

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Underground Ventilation at Butte This bulletin on underground ventilation in the copper and zinc mines at Butte, Mont., was written in 1919 from data collected by Mr. Harrington during 1916, 1917, and 1918, when he and Dr. Lanza of the United States Public Health Service were engaged on a study of miners consumption in mines of the Butte district. Largely on account of conditions arising from the World War, publication was deferred until this date, and its issuance now is because of the fact that it contains much up-to-date general information on ventilation in metal mines, though many of the specific underground conditions described have since been materially changed. The mines in the Butte district, with their hot rock, numerous veins, deep workings, and intensely concentrated activities, present to their operators many intricate problems requiring the utmost engineering skill. By no means the least of these problems is that of ventilation and this manuscript describes some of the numerous difficulties encountered in providing mine working places with safe, comfortable, and healthful air conditions. Although the...
