Forgotten Books. Paperback. Condition: New. This item is printed on demand. 156 pages. Dimensions: 9.0in. x 6.0in. x 0.3in. Excerpt from A Dissertation on the Development of the Science of Mechanics: Being a Study of the Chief Contributions of Its Eminent Masters, With a Critique of the Fundamental Mechanical Concepts, and a Bibliography of the Science; Embodying Research Submitted in Partial Fulfillment of the Requirements for the Degree of Doctor Of The word mechanics, though it indicated of old the study of machines, has long since outgrown this limited meaning and now embraces the entire study of moving bodies, both large and small, suns and satellites, as well as atoms and molecules. The phenomena of nature present to us a world of change through ceaseless motion. Mechanics is the Science of Motion as the physicist Kirchhoff has defined it, and has all natural phenomena for its field of investigation. Why things happen and how they happen are the questions that here present themselves. It was a long time before the distinction between why and how was drawn, but when once the question why was turned over to the metaphysician and the theologian, and attention was concentrated on how, then mechanics made progress. Men then began to discover how things go, and to try their hand at invention. It is not the purpose here to touch upon either the metaphysical or the psychological aspect of phenomena, nor the mystery of vegetable or animal activities, but to trace the development of Mechanics as a science from the earliest records to the present time, first analyzing the contributions made to it, step by step, and then touching upon their use and value. As the French philosopher Comte first noted, three stages are apparent in the growth of human knowledge. In the first stage, man ascribed...
