MIGRATING RAPTORS OF THE WORLD: THEIR ECOLOGY AND CONSERVATION

Cornell University Press, 2006. Hardcover. Condition: New. Many raptors, the hawks, eagles, and falcons of the world, migrate over long distances, often in impressively large numbers. Many avoid crossing wide expanses of water and follow flyways to optimize soaring potential. Atmospheric conditions and landscape features, including waterways and mountain ranges, funnel these birds into predictable bottlenecks through which thousands of daytime birds of prey may pass in a short time. Birders and ornithologists also congregate at these locations to observe...
