

## Cell Chemistry and Physiology: Part III: Volume 4C (Hardback)

Filesize: 8.52 MB

### **Reviews**

*It is one of my personal favorite pdf. Of course, it really is play, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.*

*(Nicholas Ratke)*

ELSEVIER SCIENCE TECHNOLOGY, United Kingdom, 1996. Hardback. Condition: New. Language: English . Brand New Book. The first section of this volume consists of five chapters to the nature of membrane transport systems. A chapter on secondary active glucose transport has been omitted because this topic is slated to appear in the Nephrobiology module. Chapter 6 deals with oxidase control of plasma membrane proton transport, while chapter 7 addresses the question of how cell volume is regulated. Although we chose not to have a separate chapter covering additional co-transport systems namely,  $\text{Na}^+ - \text{K}^+ - 2\text{Cl}^-$ ,  $\text{KCl}$ ,  $-\text{HCO}_3^-$ , as well as  $\text{Cl}^- - \text{HCO}_3^-$  exchange and  $\text{K}^+$  and  $\text{Cl}^-$  movements through channels, the role of each in cell volume regulation is emphasized in Chapter 7. Instead of devoting an entire section to the thermodynamics of metabolism, we thought it desirable to have the subjects of medical imaging and NMR of cell metabolism discussed in some detail in two chapters. These are followed by a chapter on the thermodynamic instrument - the calorimeter. Calrimetry allows the measurement of net changes of heat in cells, tissues, organs and whole body. As will be recognized, heat dissipation does not arise only from chemical reactions but also from interactions between macromolecules and conformational changes in protein complexes and mass  $\text{Ca}^{2+}$  movement such as that occurring in contracting skeletal muscle. The last chapter provides an account of equilibrium and non-equilibrium thermodynamics and the enthalpy balance method. It reveals that calorimetric measurements are useful in studies of clinical and toxicological problems.
