A METHOD FOR THE VALIDATION OF SPACE DEBRIS MODELS AND FOR THE ANALYSIS AND PLANNING OF RADAR AND OPTICAL SURVEYS

Shaker Verlag Nov 2003, 2003. Taschenbuch. Condition: Neu. Neuware - Today, mission planners fully rely on space debris models to assess the mission risk for spacecraft. To increase the reliability of these models they need to be validated by all available measurement data. Currently, ground-based optical and radar sensors provide most of the required data. However, these data are subjected to the geometric constraints and selection effects as well as to the sensitivity of the instruments. The scope of this...
