CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 28 pages. Dimensions: 9.0in. x 6.0in. x 0.1in. Over the past several years, operational requirements for rated officers (operators) have outpaced the Air Force's legacy operator development construct. Originally, the operator construct was based solely on pilots. Over time, this shifted to a rated construct. More recently, the rated construct has evolved to the term aircrew. This gradual shift in terminology and construct coupled with a shift in operations, a reduction of force, continued shortages of rated staff and experience, reductions in rated aircrew production, and emerging career fields (remotely piloted aircraft and cyberspace) have created significant force development challenges in the Air Force. Furthermore, Air Force operators and other Airmen must understand Air Force capabilities as presented to the joint force commander, civilian leadership (Office of the Secretary of Defense and interagency), and the American public. Present and future force presentation options include more than just the single air domain, for the presentation of Air Force operations now includes the air, space, and cyberspace domains. At the request of Gen Stephen R. Lorenz, Air Education and Training Command commander, the Air Force Research Institute hosted a Future Operator Symposium at Maxwell Air Force Base from 2 to 23 July 2009. The goal was to bring people together from throughout the Air Force to discuss what our operators should look like in the future by exploring developmental, training, and educational issues the Air Force may face in the next 70 years. Specifically, General Lorenz asked participants to assess how the Air Force will grow operators who are technically proficient in their own weapon systems and capable to effectively operate in a cross-domain environment (air, space, and cyberspace). Accordingly, the mission of the Future Operator Symposium sought to define the term...
