

Familiar Lessons on Food and Nutrition

Filesize: 4.36 MB

Reviews

It is one of my personal favorite pdf. Of course, it really is play, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Nicholas Ratke)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1882 Excerpt: .action. An equal immunity is possessed by Distilled Water before it has been in contact with the Air. But the case is very different with Rain Water, which in its descent from the clouds has amply provided itself with Oxygen. An oxide (X) is promptly formed on the surface of any lead gutters, pipes, and cisterns prepared for its reception, and as it is perfectly soft, containing only about Sulphate of Lime is included by an eminent author as a protective, with the Carbonate and Phosphate. Yet we are told that the contact of Plaster of Paris with Lead should be avoided, as it occasions corrosion in the presence of moisture. two grains of earthy salts per gallon, that oxide is readily dissolved. The presence of Zinc tends materially to promote the oxidizing and dissolving of Lead, and Zinc pipes of impure quality, which often contain a small quantity of that metal, without its presence being suspected, are doubly dangerous. There are also several substances of which the presence in Water tends to promote its action on Lead, such as Chlorides, Nitrates, Nitrites, Ammonia, and especially Organic Matter in decomposition Free Carbonic Acid in soft Water converts the Oxide of Lead which may be produced into a Carbonate of Lead, (x) which though insoluble, forms apparently on account of its crystalline or fibrous consistency, an imperfect preventive to the further oxidation of the Lead which it covers. It is moreover soluble in an excess...
