

Environmental Assessment for EnerG2, Inc. Electric Drive Vehicle Battery and Component Manufacturing Initiative Project, Albany, or (Doe/EA-1718) (Paperback)

By U S Department of Energy, National Energy Technology Laboratory

Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.DOE prepared this Environmental Assessment (EA) to review the potential for impacts to the human and natural environment of its Proposed Action-providing financial assistance to EnerG2 under a cooperative agreement. DOE s objective is to support the development of the EDV industry in an effort to substantially reduce the United States consumption of petroleum, in addition to stimulating the United States economy. More specifically, DOE s objective is to accelerate the development and production of various EDV systems by building or increasing domestic manufacturing capacity for advanced automotive batteries, their components, recycling facilities, and EDV components. DOE s program will enable market introduction of various electric vehicle technologies by lowering the cost of battery packs, batteries, and electric propulsion systems for EDVs through high-volume manufacturing. Under the terms of this cooperative agreement, DOE would provide approximately 75 percent of the funding for EnerG2 to establish a commercial-size manufacturing plant for fine-grained carbon powder (also known as electrode carbon) having a high degree of purity, a high surface area per unit mass, and an improved pore structure. The plant would be...
