Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from On the Classification of Frogs The purpose of this paper is to provide a classification that is reasonably compatible with the evolutionary morphology of adults and larvae, and consistent with the continental configurations throughout the history of frogs. The basis for the classification essentially is a synthesis and re-evaluation of data in the literature plus some new data of my own. Hopefully this classification will provide some stability for reference by non-systematists and a basis for future modification by systematists.
