

## Flash Stripper Modeling

Filesize: 5.1 MB

### **Reviews**

*It in one of my personal favorite ebook. I was able to comprehend everything using this created e ebook. I am just pleased to tell you that here is the greatest ebook i have got read through within my own lifestyle and may be he finest publication for possibly.*  
*(Timothy Johnson DVM)*

## FLASH STRIPPER MODELING

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Modeling the Advanced Flash Stripper for CO<sub>2</sub> capture using 5 m PZ | Amine scrubbing is the most mature technology for post-combustion CO<sub>2</sub> capture. Several studies have demonstrated that the advanced flash stripper (AFS) consumes less energy among stripper alternatives. This book seeks to demonstrate the AFS energy performance and cost over a wide range of CO<sub>2</sub> loading. Solvent models based on experimental results have been created by previous researchers and are available for simulation and process modeling in Aspen Plus®. In collaboration with Membrane Technology and Research Inc., various hybrid amine/membrane configurations were studied to minimize the total CO<sub>2</sub> capture cost. CO<sub>2</sub> in the flue gas is enriched by membranes from 12% to 18 and 23% for coal-fired power plant, and from 6% to 12~18% for natural gas combined cycle power plant (NGCC). The CO<sub>2</sub> loading covers the range of flue gas CO<sub>2</sub> from coal-fired power plants and NGCC. For each configuration, the cold and warm rich bypasses are optimized to minimize the energy cost. The cost optimization is also demonstrated on 5 m PZ, 5 m MDEA/5 m PZ, and 2 m PZ/3 m HMPD. The most cost-effective solvent varies with the flue gas CO<sub>2</sub>. | Format: Paperback | Language/Sprache: english | 124 pp.
