RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 96 pages. Original publisher: Lincoln, Neb. : U. S. Dept. of Interior, National Park Service, Midwest Archeological Center, 1990. OCLC Number: (OCoLC)190815682 Subject: Excavations (Archaeology) -- Utah. Excerpt: . . . populations. Furthermore, the general ecology of hunter-gatherer adaptations is discussed in order to delineate the possible structure and organization of the subsistence-settlement system of the three sites examined during the 1987 field season. Precipitation. Temperature, Climate and The great topographic and climatic diversity of Zion National Park is typical of the arid and semi-arid deserts of the Southwest and Great Basin. Tables and tabulate precipitation 2 1 and temperature data from 16 stations in southwestern Utah. The selected stations offer a range of elevation, precipitation, and temperature data which are useful in characterizing the environmental and ecological dynamics of the area. Mean annual precipitation is quite low for all stations, as would be expected in an arid or semi-arid climate (Table 1). However, the relationship between mean annual precipitation and elevation of the recording stations is notable. There does not appear to be a well defined relationship between the annual mean precipitation...
