## ABSTRACTS OF RECENT PUBLISHED MATERIAL ON SOIL AND WATER CONSERVATION (CLASSIC REPRINT) (HARDBACK)

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Abstracts of Recent Published Material on Soil and Water Conservation The results of an investigation of open channel flow in the laminar and transition ranges are presented. This type of flow is encountered during runoff from rainfall. Values of the friction factor were determined for two roughnesses and for 11 slopes varying from to It was found that for laminar flow the values departed significantly from the theoretical ones derived for smooth surfaced and that for very rough surfaces the variations depended on the slope. The results for both the laminar and transition ranges are presented graphically to permit comparison with theoretical values and with results obtained by other investigators. These data will prove useful in studies of overland flow and particularly for investigations of soil erosion. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
