Stanford University Press, United States, 2011. Hardback. Condition: New. Language: English . Brand New Book. In today s schools the number of students who receive additional resources to access the curriculum is growing rapidly, and the ongoing expansion of special education is among the most significant worldwide educational developments of the past century. Yet even among developed democracies the range of access varies hugely, from one student in twenty to one student in three. In contemporary conflicts about educational standards and accountability, special education plays a key role as it draws the boundaries between exclusion and inclusion. Comparing Special Education unites in-depth comparative and historical studies with analyses of global trends, with a particular focus on special and inclusive education in the United States, England, France, and Germany. The authors examine the causes and consequences of various institutional and organizational developments, illustrate differences in forms of educational governance and social policy priorities, and highlight the evolution of social logics from segregation of students with special educational needs to their inclusion in local schools.
