

Proceedings of the 3rd International Colloquium of the Collaborative Research Centre 562 "Robotic Systems for Handling and Assembly"

Filesize: 8.73 MB

Reviews

I just began looking at this pdf. We have read through and that i am confident that i will gonna study once more once more down the road. Your lifestyle span will likely be change the instant you complete looking at this ebook.
(Eli Rau)

PROCEEDINGS OF THE 3RD INTERNATIONAL COLLOQUIUM OF THE COLLABORATIVE RESEARCH CENTRE 562 "ROBOTIC SYSTEMS FOR HANDLING AND ASSEMBLY"

To get **Proceedings of the 3rd International Colloquium of the Collaborative Research Centre 562 "Robotic Systems for Handling and Assembly"** PDF, you should follow the hyperlink beneath and download the file or get access to additional information that are relevant to PROCEEDINGS OF THE 3RD INTERNATIONAL COLLOQUIUM OF THE COLLABORATIVE RESEARCH CENTRE 562 "ROBOTIC SYSTEMS FOR HANDLING AND ASSEMBLY" book.

Shaker Verlag Apr 2008, 2008. Taschenbuch. Condition: Neu. Neuware - Economic as well as technological reasons require industrial robot systems with improved performance characteristics - particularly with respect to dynamics and accuracy. Parallel robots based on closed kinematic chains have been widely noticed to meet these increasing demands in production technology. However, for a long time parallel robots mainly attracted researchers while industrial acceptance was low and very few parallel robots were offered. This situation has considerably changed during the last two years. More and more parallel robotic systems appear on the market and prove to be a viable alternative to conventional serial robots. One reason for the increased interest in parallel robots is that many exciting technologies and algorithms have emerged over the last decade which improve performance as well as robustness and interactivity of parallel robotic systems for real-world applications - hence enhancing user acceptance. Therefore, progress goes back to fundamental research work on parallel robots. This field is the domain of the Collaborative Research Center SFB 562 'Robotic Systems for Handling and Assembly', a research group established by the German Research Foundation (DFG) in 2000. Within an interdisciplinary framework, mechanical and electrical engineers as well as computer scientists from the Technische Universität Braunschweig and the German Aerospace Center (DLR) improve the performance of parallel robots and reduce particular drawbacks associated with these systems. For the third time the colloquium on 'Robotic Systems for Handling Assembly', organized by the SFB 562 brings together experts from the area of parallel manipulators from around the globe. Since the first Colloquiums in 2002 and 2005, many new research results have been obtained by the work of the SFB 562. Besides a presentation of this progress several wellknown international experts in the field of parallel robotics from academia as well as from...
