Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Fundamentals of Educational Measurement With the Elements of Statistical Method This book is an attempt to bridge, in part, a gap between theory and practice in educational tests and measurements. The leaders in the movement for a quantitative study of educational problems have advanced so far into the theory and more complex practical phases of the work that a very large percentage of the teachers and students have considerable difficulty in following them. Most of the books on the subject have either been more or less technical, pre-supposing considerable training on the part of the readers in the field, or they have been largely manuals of directions for giving the tests and scoring the papers, with little reference to the theory and to the problems which have confronted those attempting to measure educational processes and products. This book deals with the processes and problems in a somewhat evolutionary way so that the teachers and students may see the order in which the problems have arisen and the attempted solutions of them. A mere manual of directions for giving tests and scoring the papers will not develop a professional spirit among teachers in this field. They must understand the fundamental principles, or the work becomes purely mechanical and non-professional. It has been the aim of the author to present the fundamental principles in non-technical language, as far as it is possible to do so, and to confine the statistical treatment of the data almost entirely to simple operations in arithmetic. The author has drawn freely on the works of Drs. Edward L. Thorndike, Leonard P. Ayres, Harold O. Bug. About the Publisher Forgotten Books publishes hundreds of...
