

Modeling Survival Data: Extending the Cox Model (Hardback)

By Terry Therneau, Patricia Grambsch

Springer-Verlag New York Inc., United States, 2001. Hardback. Condition: New. 1st ed. 2000. Corr. 2nd printing 2001. Language: English . Brand New Book. This book is for statistical practitioners, particularly those who design and analyze studies for survival and event history data. Building on recent developments motivated by counting process and martingale theory, it shows the reader how to extend the Cox model to analyze multiple/correlated event data using marginal and random effects. The focus is on actual data examples, the analysis and interpretation of results, and computation. The book shows how these new methods can be implemented in SAS and S-Plus, including computer code, worked examples, and data sets.
