Nurse Executive Toolkit for Disaster Response (Paperback)

By Dr Kathy Wainscott Berger

Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.With recent disasters creating a whirlwind of changes in the way that disaster response health care is administered, nurse executives are relied upon now more than ever. Expected to direct nursing practice under stressful conditions that aren't encountered during normal daily operations, they must be easily adaptable and quick on their feet but more importantly, prepared for whenever disaster strikes. With this invaluable new guide, nurses can develop policy and program planning in order to more effectively deliver proper care during a disaster. Providing a list of competencies with measuring criteria that was developed specifically for nurse executives, Nurse Executive Toolkit for Disaster Response focuses on the three domains of administrative leadership, resource management, and professional practice. Also including a three phase training plan and resource list, the guide ensures that Nurse Executives are adequately prepared to deliver nursing care, utilizing resources from the local and national levels. With a capability checklist designed to assess areas needing additional planning and attention, this priceless guide by Dr. Kathy Wainscott Berger provides everything needed to ensure proper preparation. Written with a...
