Reviews

A brand new electronic book with a new standpoint. It is written in basic phrases rather than confusing. It has been designed in an extremely basic way which is merely right after I finished reading through this publication where it basically altered me, change the way I believe.

Anthem Press. Hardcover. Condition: New. 250 pages. Dimensions: 9.0in. x 6.0in. x 1.0in. The overarching aims of *Structure, Agency, Biotechnology: The Case of the Rothamsted GM Wheat Trials* are threefold, with each strand intertwined with the others. Firstly, the aim is to propose a way of filling the analytical gap found in current literature by offering an original theoretical framework. This framework is able to assess both the content and context of the scientific field without subscribing to humans quasi-Promethean capabilities and without resorting to what theorists refer to as conflationist strategies. Second, the aim is to examine the 2012 GM wheat field trials carried out by Rothamsted Research, which have been associated with the second push of agribiotech firms to bring Genetically Modified Organisms (GMOs) to the UK, by using the suggested framework. Third, the volume suggests a clear set of guidelines, which stem from the methodological and theoretical deep structure of the suggested framework but do not demand prior theoretical knowledge, which can be used by a wider audience engaged with biotechnology. This audience can draw on the guidelines either for reasons of developing a critical understanding of particular situations or for initiating the process of sustained dialogue between involved parties. These two dimensions are of great significance for practical policy orientations. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.
