SCION PUBLISHING LTD, United Kingdom, 2016. Paperback. Condition: New. Language: English . Brand New Book. Biochemistry is a major new textbook designed and created specifically for briefer courses in the subject. Written by Prof. Terry Brown of the University of Manchester (author of Genomes and Gene Cloning), the book provides the necessary detail and rigour expected for these courses, but without the extraneous material found in the larger textbooks. With an increasing number of students taking a short course in biochemistry there is a growing need for a book that covers the subject concisely and succinctly. Biochemistry has been designed from the outset for these shorter courses; it is not a cut-down version of one of the larger books that dominate the market. Although it is shorter, there is no compromise in content, style and coverage. The book is attractively designed in full colour throughout with all the pedagogical features expected in a major textbook. It covers what students should be expected to know and is written in the clear and accurate writing style for which Terry Brown is widely lauded. With its competitive price and resources for adopting lecturers (all of the illustrations and diagrams from the book, and answers to the end of chapter questions), Biochemistry will become the textbook of choice for any brief biochemistry course. Confirmed Adoptions Biochemistry is already the recommended text at the following institutions: Becker College, USA Bishop Burton College, UK Bournemouth University, UK Charleston Southern University, USA Colorado State University - Pueblo, USA Liverpool John Moores University, UK Newcastle University, UK Rivier University, USA Staffordshire University, UK Stephen S Austin State University, USA Texas Christian University, USA Umea University, Sweden University of Aberdeen, UK University of Bedfordshire, UK University of Brighton, UK University of the Incarnate Word, USA University of Kansas, USA...
