It is sure to be an invaluable resource to scientist-practitioners during the education and training process as well as to those continuing their professional development. With this Handbook, we have a great resource to facilitate what is ready for translation from research to practice now. And Part IV takes up special issues relevant to practice and research in the field (minority issues, women's issues, working with geriatric populations, public health approaches to health psychology and behavioral medicine). Besides considering health problems, the handbook also discusses professional issues, such as: working with a multidisciplinary staff; conducting research; evaluating outcomes; and, practicing in public health settings. The Handbook will prove an invaluable resource for those already working in the field of health psychology as well as for those in training. The editors have developed an...
