BODY COMPOSITION PREDICTION BY MULTIVARIATE STATISTICAL MODELING

SPS Jan 2016, 2016. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - The assessment of human body composition (BC) is important for evaluating health and nutritional status. Increased fat mass is associated with an increased risk of metabolic diseases; declined lean mass or fat-free mass is also directly related to health and particularly with the mortality rate. More importantly, reduction in lean mass occurs together with an increase of body fat during aging;...
