

Health in the green economy: health co-benefits of climate change mitigation - transport sector (Paperback)

By World Health Organization(WHO)

World Health Organization, Switzerland, 2014. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Cycling, walking and rapid transit systems are associated with a wide range of health benefits that need to be reflected more systematically in transport and development policies. Health benefits may include: reduced risk of heart disease, some cancers, type 2 diabetes, and some obesity-related risks from more physical activity; reduced health risks from urban air pollution; reduced traffic injury risks and less noise stress. Rapid transit, walking and cycling systems also improve access to vital jobs, services and opportunities and ease the mobility of vulnerable groups, such as children, people with disabilities, and older adults, enhancing health equity. This report, part of the Health in the Green Economy series, considers evidence regarding health co-benefits, and risks, of climate change mitigation strategies for transport, as reviewed by the Intergovernmental Panel on Climate Change.
