## CHIRAL LEWIS ACID

Alphascript Publishing Jan 2010, 2010. Taschenbuch. Condition: Neu. Neuware - Chiral Lewis acids (CLAs) are a special class of Lewis acid catalyst used in enantioselective/asymmetric synthesis reactions which produce optically active products from optically inactive or impure starting materials. This type of preferential formation of one enantiomer or diastereomer over the other is formally an asymmetric induction. The electron accepting atom of CLAs are typically metal halides such as those of indium, zinc, lithium, aluminium, titanium, or boron and the chiral ligands employed...

### Reviews

*The very best publication i possibly read. it was writtem very perfectly and useful. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Wilhelm Predovic**

*This is an awesome publication i have at any time read. Of course, it is play, still an interesting and amazing literature. You will like just how the author write this book.*

-- **Prof. Herta Mann**
