Brand New Book ***** Print on Demand *****.Excerpt from The Treatment of Uterine Diseases: By Means of the Hot-Air Bath and Hot-Vaginal Douche My practice and observation of the treatment of Uterine Diseases have extended over a period of fifteen years; and in that time many plans have been suggested for the cure of the various displacements, congestions, inflammations, and ulcerations of the uterus and its appendages. Admirable as some of these methods seemed in theory, the general results have been far from satisfactory. In most instances the relief has been temporary, while in many cases the patient has received more injury than benefit from the hurtful, irrational, mechanical contrivances and harsh local applications used for her relief. Not that I wholly condemn, in rare individual instances, the use of mild astringent lotions and one of the few sensible supports; but more recent observation and experience have led me to the conclusion that our want of success has arisen largely from a misconception of the usual causes producing Uterine Disease.
