SENSOR APPLICATIONS [PAPERBACK]**DOWNLOAD**

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Pages Number: 353 in Publisher: Xi'an University of Electronic Science and Technology; 1 edition (September 1. 2006). Book is necessary for sensor applications. the basic techniques and skills as the goal. a systematic introduction to the principle of the sensor and its characteristics and parameters of the sensor signal processing method and interface technology. anti-jamming technology to display and adjust the basic knowledge of instrumentation. measurement. and error handling. sensor selection and installation and adjustment techniques. displacement. force. torque. load. speed. acceleration The detection technology of the mechanical quantity. the amount of detection technology. temperature. pressure. flow. Level. Humidity detection and gas analysis technology. detection. imaging and security technology. intelligent and automated testing technology. The book is divided into 14 chapters. The book. a comprehensive introduction to the resistive. capacitive. inductive. eddy current. pressure turtle. ultrasonic. Hall. photoelectric. fiber optic. laser. thermal. gas. humidity. ion sensitive. frequency-type sensor . digital encoder Inductosyn. magnetic grid and grating sensor principle and characteristics. Which also includes IR. UV. CCD. PSD. color and other new types of sensitive components and their applications. The highlight of the book develop the skills of the students to apply the sensor. such as proximity sensors. pressure sensors. Inductosyn installation technology. infrared. ultrasonic. microwave detect the installation of burglar alarm technology. In addition. the book also lists more practical sensor circuit as well as practical device production sample. The rich and innovative book. the language concise. clear concepts. structured. focused. practical. and are accompanied by appropriate exercises for each chapter. The book is easy to teaching. is one able to adapt to economic development. technological progress and production practices. practicality and teaching functions are strong materials. The book...
