CETARTIODACTYLA

Alphascript Publishing. Taschenbuch. Condition: Neu. Neuware - Cetartiodactyla is the clade to which whales (including dolphins) and even-toed ungulates have currently been placed. The term was coined by merging the name for the two orders, Cetacea and Artiodactyla, into a single word. The term Cetartiodactyla reflects the idea that whales evolved from within the artiodactyls. Under this definition their closest living land relative is thought to be the hippopotamus. The clade formed by uniting whales and hippos is called Whippomorpha...
