

Environmental Concerns of Economic Development

By N.L. Murthy, T.J. Rani, G. Rajaiah, K.V. Narayana, Mohd. Iqbal Ali & M.A. Kumar (Eds)

Serials Publications, 2008. Hardcover. Book Condition: New. Environment and Development are not the two separate entities but linked together in a complex system of cause and effect. Environmental problems arise as a consequence of lack of development and from unprotected and unintended consequences of economic growth. It is a byproduct of modern development, growth and equity. As per the traditional theory `economic development` refers to a process of economic transformation involving the structural transformation of an economy through industrialization and improvement in the quality of human lives. The recent concept of development refers to sustainable development which not only aims at development but also to protect the environment. The World Commission on Environment and Development Report warned about the problem of industrial waste management challenging us as a society and wanted as much care to be taken for the present and succeeding generations as for those in the distinct future. Much of `Human Development` has taken place in terms of provision and enabling better health, education and income opportunities. They act as presumes on various socio-economic and environmental attributes. Examples are with better health provision, expectation of life can improve, percapita income may increase, demand for ground water may increase, forest...
