Brand New Book ***** Print on Demand *****.Excerpt from Suggestibility in the Normal and Hypnotic States Early investigators in the field of hypnosis realized that there was some connection between hypnosis and suggestion but, nevertheless, the two fields of research have developed independently of each other. Hypnosis remained in the realm of clinical speculation while several experimental techniques were being developed for the investigation of suggestibility. With the use of these newer techniques it is now possible to return to the experimental investigation of the relationship that exists between the two.
