

Geology and Oil Production in the Tuscola Area, Illinois (Classic Reprint) (Paperback)

By Hubert M Bristol

Forg otten Books, 2018. Paperback. Condition: New. Language: English. Brand New Book ****** Print on Demand ******. Excerpt from Geology and Oil Production in the Tuscola Area, Illinois The Tuscola Anticline, in east-central Illinois, lies astride the complex Lasalle Anticlinal Belt and dips steeply westward into the Fairfield Basin and gradually eastward into the Murdock Syncline. The anticline is broken into two structural highs, the Hayes Dome and the Shaw Dome. Pleistocene sediments, 50 to 250 feet thick, cover the area. Pennsylvanian sediments cover much of the area, thinning to expose an inlier of Mississippian, Devonian, and Silurian rock north of Tuscola. The basal Cambrian for mation, the Mt. Simon Sandstone, is penetrated by only two wells. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
