Jones Press. Paperback. Condition: New. This item is printed on demand. 132 pages. Dimensions: 8.5in. x 5.5in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906. Excerpt: . . . OF SOME OTHER USEFUL WINTER FLOWERING SUBJECTS Plush Flower (*Acalypha hispida*). --A remarkable New Guinea plant introduced under the name of *A. Sanderi*. Good plants should be well leaved to the base, and show numerous of the singular red tail or catkin-like spikes, which are 15 to 18 inches long. Strike the tops of the shoots in April, and grow on in a stove or intermediate house, repotting as necessary. Should not be pinched during the first year, but during the second and after years; if treated thus large bush plants may be obtained. Keep in an intermediate house when in flower. Amasonias The best is *Amasonia calycina*, with red bracts and tubular yellow flowers. The bracts remain bright for many weeks. Strike shoots in early June, and grow on unpinched in the warmest house. Should be far more grown. Aphelandras Some of these are very brilliant flowers, but they do not last long. Treat as *Jacobinia*. Boronias Exquisite is the fragrance of the dull red and green bell-flowered *Boronia megastigma*. Well furnished little specimens may be procured from those who make heaths a speciality. A few plants to flower in January may be hurried on in an intermediate house, placing them to flower in a cool one. There are other species more brilliant, less fragrant. Treatment--see *Erica*. Bouvardias are ever useful for cut flowers. Strike cuttings in March, and when well rooted nip the point out. This stopping must be continued, nipping out the points when...
