Createspace Independent Publishing Platform, United States, 2016. Paperback. Book Condition: New. Illustrated. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.The great historic monuments, Stonehenge, and the Giza Pyramids, stand as evidence for plasma physics on the cosmic scale. The alignment of the pyramids with the meridian is so precise as if it had been achieved with a marker in the sky as a reference point, which likely was the case. In the recovery period from the last Ice Age, some of the features of the "Primer Fields that focus interstellar plasma unto the Sun would likely have been visible in the night sky on the horizon. The Stonehenge monument, too, reflects features of plasma physics that were likely seen in the sky, at the time, and were replicated. The only visible evidence of cosmic plasma physics that remains in modern time, are the solar wind and the solar corona. In mainstream cosmology, both remain an enigma and are largely ignored as no basis is recognized for them to exist. In plasma cosmology, no such enigma is encountered. Here the anciently and modernly recognized phenomena blend as reflections of common universal principles that are well understood and experimentally replicated in laboratory experiments, and are even evident in satellite measurements in space. The evidence illustrates that the Plasma Universe is not entropic in nature, but is self-creating and self-sustaining by the nature of space that is energy itself, which is a concept pioneered by David Bohm, whom Einstein had referred to as his successor. In the real universe, the cosmic operations are anti-entropic in nature, and expanding and progressing. We, ourselves are evidence of this progression. Neither is our Sun isolated from the progressive nature of the universe, but expresses its dynamics, its resonating plasma...
