Excerpt: .up to the animal, and after some difficulty a mount was obtained, when the surgeons noticed that the glans presented several openings or fistulas, showing that abscess had occurred here, and it was pierced like a watering-pot. There was a good deal of fetid discharge from the prepuce, as well as the sheath, but I was told that treatment is very difficult, as the penis of the bull is powerfully retracted within the prepuce (unlike the horse), and difficult to be denuded. I was lately in conversation-with a gentleman, a large former in Suffolk. He told me that he is often disappointed when he wishes to breed from cart mares. This year, out of his own working stock of twenty-eight horses, eleven mares did not stand; greatly to his disappointment and loss, as a yearling cart colt is worth 201., and the mare ceases work..
