PRESENT-DAY AND EARLY STAR FORMATION

Südwestdeutscher Verlag für Hochschulschriften. Paperback. Condition: New. 152 pages. Dimensions: 8.8in x 6.0in x 0.5in. Stars form from molecular cloud cores by gravoturbulent fragmentation. Understanding the angular momentum and the thermal evolution of cloud cores thus plays a fundamental role in completing the theoretical picture of star formation. This is true not only for current star formation as observed in regions like the Orion nebula or the ρ -Ophiuchi molecular cloud but also for the formation of stars of the first or...
