BUY A HOUSE IN A DECLINING PRICE MARKET: HOW TO AVOID GETTING SCALPED

[DOWNLOAD](#)

Universal Self Help Publishing Company, Incorporated, United States, 2012. Paperback. Book Condition: New. 235 x 190 mm. Language: English . Brand New Book ***** Print on Demand *****.A highly experienced real estate broker/investor/builder reveals proven methods for getting a steal - or at least a great deal - in the current real estate market. Buying a home is something too many people take lightly because it's easy to buy with low interest rates and easy down payment loans. It is easy to buy a house, but real estate lacks liquidity, and it is much harder to sell a house than to buy one. Too many buyers don't realize that they are getting scalped by a home selling system that is complicated and little-understood by the general public, and especially by novice buyers. The book covers why things are different now than in the past; we have a new paradigm. It teaches you how to avoid getting scalped by learning to understand the market and pinpoint the best area, based on a number of important factors unique to you and your family, to make your purchase. Most buyers are familiar with inflation because it's been with them all their lives; however, deflation is a very big factor in many parts of the economy when you have credit contraction. Deflation is having an especially drastic effect in the housing market and it's one of the reasons for the new paradigm. You will make an intelligent buying decision by understanding what effects inflation and deflation will have on your home ownership. The book deals with the long term effects of your home purchase. You can't just buy based on today's needs; most people do; but the future is a lot more important than most of us imagine....
