

Manipulating Light: Reflection, Refraction, and Absorption (Exploring Science: Physical Science)

By Stille, Darlene R.

Compass Point Books. LIBRARY BINDIN. Book Condition: New. Dust Jacket Condition: new. 0756512581 Book Description Provides an explanation of how light works, including how it bounces or reflects, how it bends or refracts, and how light gets absorbed. Also discusses mirrors, telescopes, and colors. Editorial Reviews From School Library Journal Grade 5-8-Each of these slim titles provides a straightforward and clear discussion of its topic. In all of the volumes, the print is quite small, but the explanations are thorough. The first book examines how light behaves, the law of reflection, mirrors, refraction, and absorption. The second one discusses physical change and molecules; the changing states of matter; mixing and separating solids, liquids, and gases; and physical change in nature. In the last title, readers learn about water, sound, light, radio, and earthquake waves. In all, the author makes use of Did You Know? boxes to highlight additional facts. Full-color photographs, illustrations, or diagrams appear on almost every page, accompanied by captions that complement the text. The open layout and brevity of these titles will appeal to students.-Maren Ostergard, Bellevue Regional Library, WA Copyright © Reed Business Information, a division of...

Reviews

This publication is really gripping and exciting. It really is basic but unexpected situations in the 50 % in the book. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Prof. Salvador Lynch

A top quality book along with the typeface employed was interesting to learn. It is one of the most amazing book we have study. I discovered this pdf from my i and dad recommended this book to learn.

-- Mr. Sterling Hane
