RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 172 pages. Original publisher: Golden, CO: National Renewable Energy Laboratory, 2006. OCLC Number: (OCoLC)172695367 Subject: Wind turbines -- Testing. Excerpt: . . . AND 2. 0 SCOPE PROJECT METHODOLOGY GOAL OF THE PROJECT The major goal of this study was to ascertain the elastic blade twist due to wind turbine operation which leads to errors in the prediction of loads and performance for three promising and representative A wind turbine rotors. secondary goal was to develop, verify, and present a practical engineering methodology for the estimation of this elastic twist on other wind turbine rotors. SEMI-EMPIRICAL APPROACH This program was divided into two parts of equal importance, experimental and theoretical. There were not enough resources in the program to permit a sophisticated engineering analysis in either area, so a practical engineering approach was taken ( Fig. and has proved efficient and effective. This allowed 24, the derivation of semi-empirical blade aeroelastic models with which to calculate the steady elastic twist. Codes: Computer I BLADE SECTION PROPERTIES I and STATIC DEFLECTION STRESSES I VIBRATION MODES BLADE Laboratory Tests: INSPECTION I EXTERNAL SIMPLE OF VIBRATION I FREQUENCY STATIC DEFE CTION...

### Reviews

*This book is definitely worth getting. It usually will not price too much. Its been printed in an extremely simple way in fact it is only right after i finished reading this publication where basically altered me, modify the way i think.*

-- **Avery Daugherty**

*Comprehensive information for publication enthusiasts. It is rally exciting throgh reading through time. I am happy to tell you that here is the greatest book i have got read through in my personal existence and can be he best ebook for possibly.*

-- **Reese Morisette**
