The very best publication i at any time study. It really is basic but shocks inside the fifty percent of the ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.

Organizational-level doctrine in Publication 7-0 provides underlying principles for the development of more specific operational-level doctrine and TTP to manage cutters, boats, aircraft, facilities, C4ISR, personnel and special resources used for mission execution and mission support. This doctrine identifies four disciplines that together form the Capability Analysis and Management Framework (Figure 1), and which form Chapters 2-5 of this document: Chapter 1: Capability Management Doctrine - Description of capability management within the Coast Guard, stakeholder relationships and consideration of risk and readiness assessments in capability decision-making. Chapter 3: Requirements Generation and Management - Maintaining traceability of validated requirements within a requirements inventory through all derived requirements and to an organizationally recognized source. - Chapter 4: Capability Sustainment - Monitoring capability to ensure it meets design requirements, both now and in the future.
