Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1901 Excerpt: .from one flower to the other. We have seen how the wind carries the pollen of the osage-orange tree; but there are other ways in which the pollen is carried. Tarry by the roadside and watch the insects as they go from flower to flower in search of the sweet liquid which we call honey. At the same Stamens shedding pollen befo e the stigma is A later stage; the stigma is ready or ready to receive it. pollen but the stamens are withered. time that the insect gathers honey for himself, he pays his way all unconsciously by carrying pollen for the flowers. It makes no difference to the flower how the pollen is carried so long as it reaches the other flower and is deposited in the proper place. With this in mind it is interesting to note also that insects usually go...
