

## Nitrogen Deposition, Critical Loads and Biodiversity

Filesize: 7.09 MB

### **Reviews**

*An extremely great ebook with perfect and lucid answers. This is certainly for anyone who stante that there was not a well worth looking at. Its been designed in an exceptionally simple way and is particularly only soon after i finished reading through this ebook in which actually transformed me, modify the way in my opinion.*  
*(Libbie Farrell)*

## NITROGEN DEPOSITION, CRITICAL LOADS AND BIODIVERSITY

To download **Nitrogen Deposition, Critical Loads and Biodiversity** eBook, make sure you click the web link under and save the document or have access to other information which might be in conjunction with NITROGEN DEPOSITION, CRITICAL LOADS AND BIODIVERSITY ebook.

Springer. Hardcover. Book Condition: New. Hardcover. 535 pages. Dimensions: 9.2in. x 6.3in. x 1.4in. This volume brings together extended reviews and papers of new scientific research on atmospheric nitrogen deposition impacts globally. While there is a wealth of evidence on the magnitude, components and effects of nitrogen disposition on floral biodiversity in Europe and North America, there is an obvious lack of information on impacts on above- and below-ground fauna, and all impacts in other parts of the world, with no clear overview of how the different strands of evidence fit together. This overall synthesis is targeted at the international conventions, but is equally readable for scientists, environmental managers, conservation agencies and policy makers. This timely book highlights the global nitrogen deposition problem. Major regions of the world are exceeding sustainability thresholds for adverse effects on ecosystem function and biodiversity. This highlights the importance of ongoing work, including under the Convention on Biological Diversity, in developing indicators and monitoring nitrogen deposition effects to enable appropriate measures. This book presents a milestone towards this global goal as the international community works toward meeting the Aichi Biodiversity Targets, especially Target 8: By 2020, pollution, including from excess nutrients, has been brought to levels that are not detrimental to ecosystem function and biodiversity. Braulio Ferreira de Souza Dias, Executive Secretary, Convention on Biological Diversity This key volume highlights the global challenge to reduce atmospheric nitrogen pollution resulting from energy production, transport and agricultural activities. It takes forward the agenda recently launched in the UNEP commissioned report Our Nutrient World. Dr. Anjan Datta, UNEP. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.
